WHO WE ARE

Who we are

LP Development and Innovation Ltd

A company with modern and innovative ideas

Our History

Our company is consisted of different people with different background with a lot of international project experience.

LP Development operates in two different main business areas:

Constructions & Renovations

and Marketing

Though they look different, they are joined harmoniously and give us the power to offer you unique services something that other companies cannot easily do so.

We started in the early 1996, at the beginning mainly providing IT (websites and custom software in Perl, CGI and later in PHP) & Marketing services (mainly print advertising). In 2002 we started our timid steps in the field of shop renovations and we started to provide to our customers unique services for their new business. In a few years we could offer them full renovation of their new shop or business and at the same time competitive marketing and advertising solutions. With our experience we could help them properly to set up or design their products and guide them to reach their goals. On the other hand, due to our structure and the existing partnerships in construction and Marketing sector, we have been able to provide additional construction and promotional services through the construction of **unique exhibition stands for our customers**. In 2006, along with the above, we have fully entered into the field of construction and technical projects. Besides renovation (business & homes) services we also involved in composing technical studies for public and private sectors. In order to be able to have **competitive prices for our renovation services** and after working with different factories in wood sector, we gain permanent and reliable partnerships. And the last two years we are one of the pan-European representatives of one of these kitchen and wardrobe factories that manufactures high quality products for more than 30 years. We love these products (www.wood-and-glass.com), are high quality and have high score in relation between quality and cost of purchase. This gives us the opportunity to be even more competitive in our services and at the same time to sell high quality products that we really love! But the most important of all is that we know that our clients when they choose to buy our products they will be certain that we were the first who tested for many years now as a contractor and we were the first who compared them with other similar products in global market before we finally choose to sell them and use our brand name.

With all this construction experience our customers will be sure that they will buy a product that will last for many years to come!

Our experience upon all these different business fields gave us the possibility to

**see things differently,
to do things out of the box
and to have innovative ideas.**

And that is what makes us different!

We started LP Development and Innovation LTD **with a dream**, to be more creative and more innovative than ever!

Our experience, our customer's support for all these years and our seek for perfection makes us so good in our business.

Our History

appeared in the Piraeus market for the first time as a shipping services entity in 1919. Since and economic circumstances, it has always stood by the side of its numerous clients, playing an important role in the development of the shipping industry in Greece.

World War II, the company expanded rapidly as a second generation emerged alongside the fully claimed a significant share of market activity in chartering and sale and purchase of vessels. In particular, it acted as a pioneer through fostering strong ties with the socialist countries of Eastern Europe, these market for chartering and conducting some of the first second-hand sale and purchase transactions for Japanese vessels.

It led to the establishment of GEORGE MOUNDREAS & COMPANY S.A. in 1974. Under the wise leadership of Mr. George Moundreas (+1987), a legendary name in the Piraeus shipbroking world, his son George S. Moundreas followed in his footsteps, guiding the company's future development and guided it to its current position of strength and high reputation.

It brought to the forefront the third generation of family management of GEORGE MOUNDREAS & COMPANY S.A. The President's sons, Pavlos Moundreas (Vice President) and Vasilis Moundreas (Director), promise many more years of continuity and success in the future.

Exclusive agent

Our main goal is to develop the Greek shipping industry, becoming the main hub for ship repair and conversion of commercial and leisure vessels, as well as the offshore industry and industrial ship construction, not only in Greece but the entire Mediterranean.
